Qualitative

Comments -

- I absolutely love Professor Baggett! He is funny and easy to listen too. He also knows the material well and is always eager to help students if they need it. I personally struggled in this class because it is a difficult course however Baggett made it doable.
- Dr. Baggett is a great professor! I think it would be helpful to have more hands-on worksheets to help us understand how the formulas work.
- This class helps to give an intro to Stats well, I just don't believe I understood most of the material due to family issues going on in my home I could not concentrate.
- He tried very hard to make the subject interesting. I also enjoyed the 2nd part of the exam being with a group.
- The instructor should find ways to relate the topics of the class to more interesting things. The use of R Studio is confusing, and I don't recommend using it in future classes. It was a hassle, and I think geared more toward students who will be pursuing a career that is focused on numbers and statistics rather than a class full of psychology and social work majors. I looked forward to learning statistics because I did not take it in high school, and sadly, I was let down. I was excited to do math since I filled my required math courses before coming to college, and I was disappointed when we didn't actually apply the math to what we learned. This is a challenging subject and a challenging class, but it is not impossible to do well.
